NTC Unleaded Disc

Thermometrics
Thermistors

Applications

- Typical applications include automotive engine temperature gauge driving

Features

- Available as a broad range of resistances and material systems
- High sensitivity to changes in temperature
- Suitable for probe mounting
- Normally used for gauge driving under self-heated conditions
- Wide operating temperature range: -58°F to 311°F (-50°C to 155°C)
- Rugged construction
- Proven quality and reliability over many years of manufacturing
- Excellent stability

Amphenol
Advanced Sensors

Type KU Specifications

Unleaded Disc

Description

A range of unleaded disc thermistors.

Options

- Other resistance-temperature characteristics
- Custom design to match gauge characteristics
- 'Washer' configuration with central hole

NTC Type KU dimensions

Type UD20 Specifications

Unleaded Disc

Description

Unleaded disc thermistor for engine temperature measurement.

Options

- Other resistances
- Other tolerances, tolerances at other temperatures
- Alternative sizes and configurations
- Alternative material systems and resistances
